## **Introduction:**

This document is a guide on how to preform a backup and restore for Almadar cloud VMs and vApps (this option is available depending on the contract)

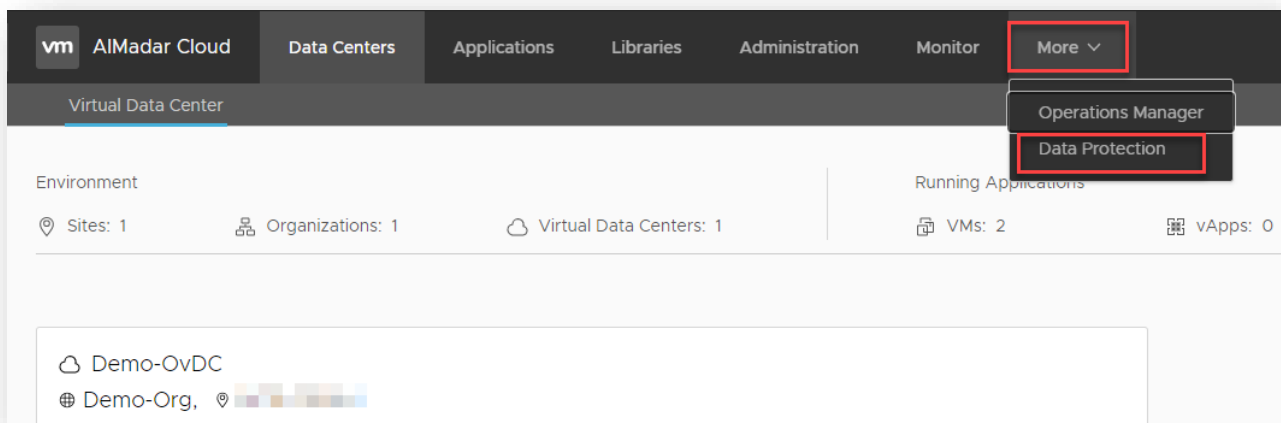

## **Content:**

- [Access to Almadar Cloud Portal.](#)
- [Access on OvDC.](#)
- [Navigate to Data Protection.](#)
- [Preform Backup](#)
- [Preform Restore](#)

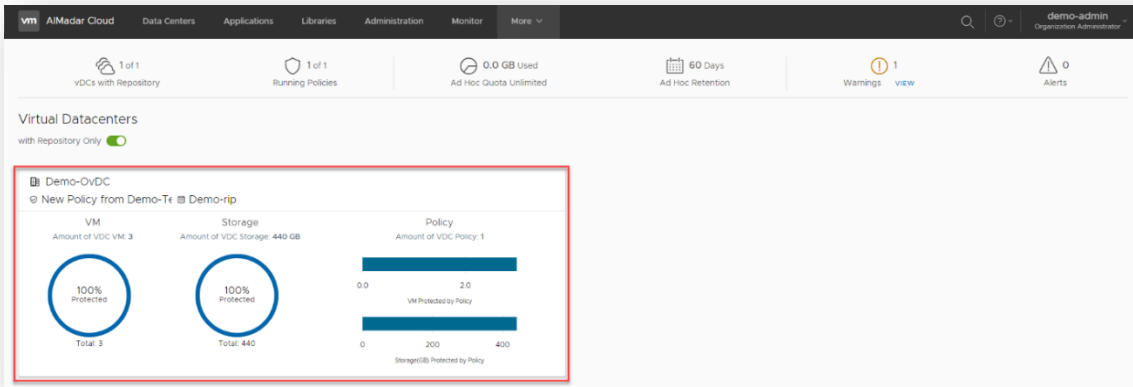

1. Access to Almadar Cloud Portal with admin user that provided from Almadar Team.

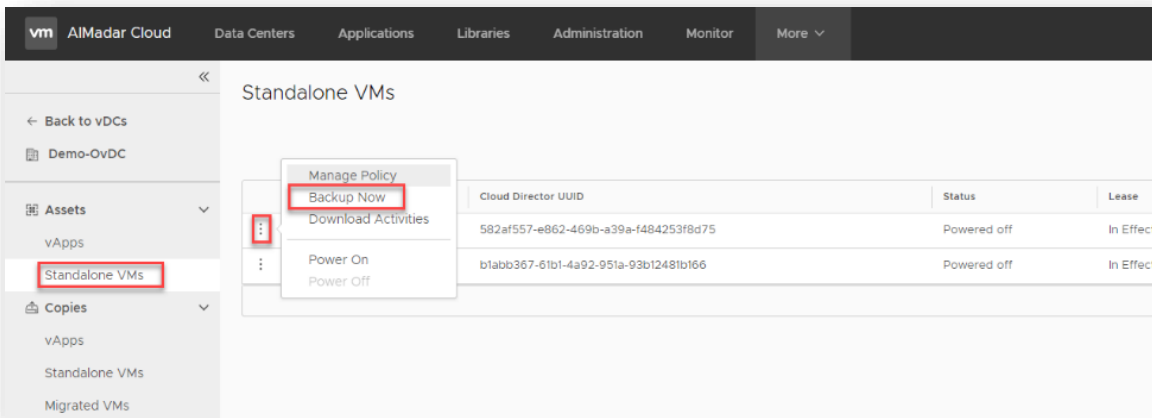

2. Click on More then choose Data Protection.

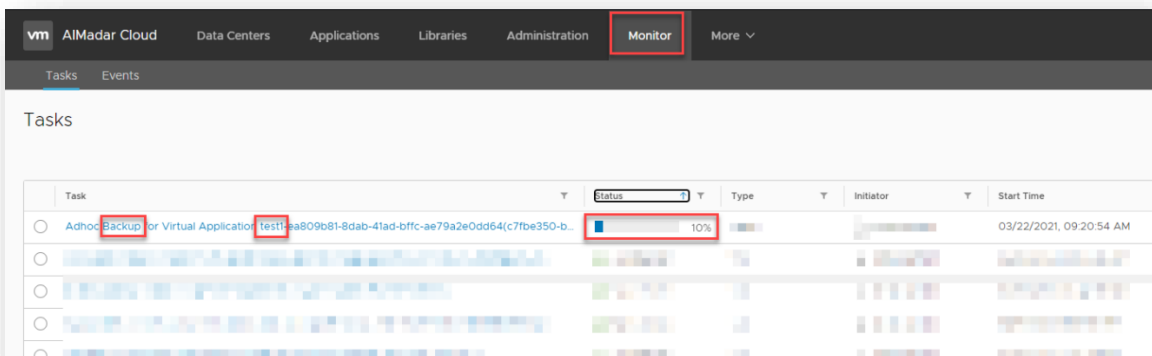

3. Click on the OvDC

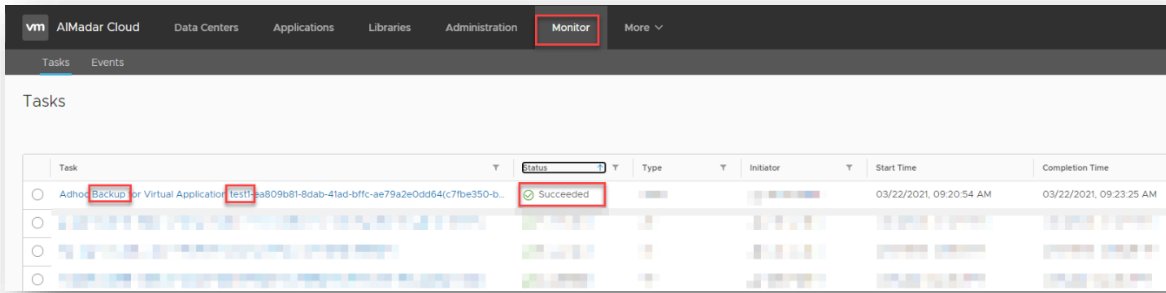

4. Perform backup now according to your requirement you can Back up a whole vApp or a standalone VMs and the steps are similar, the shown below VM backup.

Check the progress of the backup

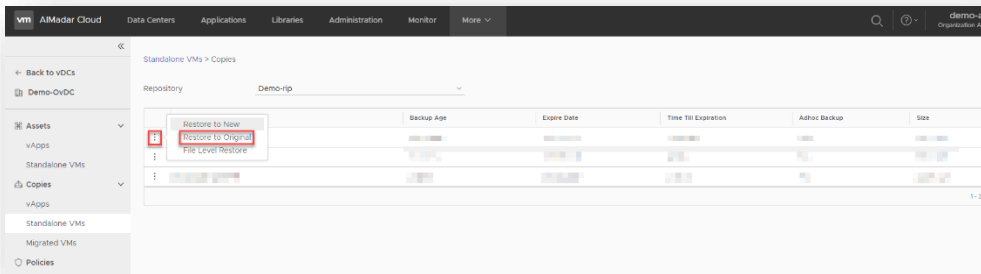

## 5. Perform a restore

For restoration of the backup you have two options:

- Restore to New: Create new VM/vApp and make sure to make it with different name so it doesn't over write the old VM.
- Restore to original: over write the original VM.

Check the progress of the restoration
